

DORIAN AMRI

DATA SCIENTIST | AI, BIG DATA & MLOPS

Machine Learning • Deep Learning • Spark • MLOps • Generative AI

Toulouse, France

+33 7 61 32 83 61

amri.dk@hotmail.com

linkedin.com/in/dorian-

amri-8685a2177

Data Scientist / AI & Big Data engineer trained in Artificial Intelligence & Big Data, with hands-on experience in Python, OCR, NLP, RAG, AI agents and complex technical-data analysis. Two completed portfolio projects extend the profile into Big Data and MLOps using Spark/PySpark, Hadoop, Databricks, MLflow, Docker, FastAPI, CI/CD and Azure/AWS cloud architectures.

DATA, BIG DATA & AI EXPERTISE

DATA SCIENCE

Python • SQL • Machine Learning
• Deep Learning

BIG DATA

Spark • PySpark • Hadoop •
Databricks

MLOPS & CLOUD

MLflow • Docker • FastAPI • CI/CD
• Azure/AWS

GENERATIVE AI

Hugging Face • LangChain • RAG •
Vector DB • AI Agents

PROFESSIONAL EXPERIENCE

Avionics Systems Engineer - Flight Warning

AKKODIS | ATR assignment

May 2026 - Present

Permanent contract • Blagnac

- Analysed and structured ATR 42-600/72-600 alerting data by ATA chapter.
- Checked consistency across CAS messages, alert levels, aural warnings, crew procedures and cockpit effects.
- Cross-checked technical sources and produced structured synthesis and traceability deliverables.
- Contributed to system studies supporting a future aircraft generation.

Systems IVVQ Engineer

AKKODIS | Naval Group assignment

Mar. 2026 - Apr. 2026

Permanent contract • Toulon

- Structured system and software requirements for an underwater-drone mission-management application.
- Organised and analysed requirements in Excel matrices supporting verification and validation.
- Contributed to engineering-data traceability and IVVQ activities in a defence environment.

Apprentice Systems Engineer - MBSE & AI

ALTEN

Oct. 2023 - Oct. 2025

Apprenticeship • Toulouse

- Developed Python OCR and document-processing pipelines using Hugging Face and Docling.
- Prototyped NLP, RAG and AI-agent solutions to extract, structure and retrieve technical information.
- Modelled requirements using SysML, Capella and Cameo; contributed to Smart Requirement Modeling.

PCB Test Application Engineer - Apprentice

CONTINENTAL

Sep. 2022 - Aug. 2023

Apprenticeship • Toulouse

- Developed and improved test applications for electronic printed circuit boards.
- Analysed test anomalies and coordinated with electronics, software and validation teams.
- Structured and improved technical test documentation and tracking data.

INTERNSHIPS

RAMS Engineering Intern

Sep. 2021 - Mar. 2022

APSYS (Airbus)

Internship • Toulouse

- Contributed to RAMS analyses for EGNOS V2: reliability, availability, maintainability and safety.
- Supported technical reviews and system-validation documentation.

Electronics Engineering Intern

May 2020 - Aug. 2020

IRAP

Internship • Toulouse

- Defined technical specifications for an electronic board associated with the COPILOT scientific instrument.
- Analysed hardware needs and interfaces within a multidisciplinary scientific team.

EDUCATION

Master's-level programme in Artificial Intelligence & Big Data

2023 - 2025

IA School Toulouse

Engineering curriculum - Embedded Electrical & Electronic Systems

2022 - 2023

CESI Toulouse — one-year apprenticeship

DUT in Physical Measurements

2018 - 2020

IUT Paul Sabatier

Scientific Baccalauréat

2015 - 2018

Lycée Saint-Exupéry

DATA, BIG DATA & MLOPS SKILLS

DATA SCIENCE	BIG DATA & CLOUD	MLOPS & APIs	GEN AI & ANALYTICS
Python • SQL Machine Learning • Deep Learning TensorFlow • PyTorch Anomaly detection Analysis & prototyping	Spark • PySpark Hadoop • Databricks Azure • AWS Data pipelines Cloud architecture	MLflow • Docker FastAPI • REST APIs CI/CD • GitHub Actions Git • VS Code ML industrialisation	Hugging Face • Docling LangChain • FAISS/Chroma OCR • NLP • RAG • AI Agents Power BI • Advanced Excel Vector search
LANGUAGES French: Native • English: Negotiation level (C2) • Arabic: Fluent • Spanish: Basic (A2)			

DATA, BIG DATA & AI PROJECTS

Anomaly detection & clinical recommendation Data Science prototype using patient data to detect anomalies, support functional diagnosis and generate personalised recommendations from detected patterns. Python • Machine Learning • Deep Learning • anomaly detection • recommendation
Predictive Maintenance & Big Data Platform — portfolio project (2026) Design of a predictive-maintenance platform: distributed sensor-data processing with Spark/PySpark and SQL, Databricks/Hadoop architecture, experiment tracking with MLflow, FastAPI serving, Docker containerisation, CI/CD and Power BI reporting. Azure-targeted cloud architecture. Spark • PySpark • Hadoop • Databricks • MLflow • Docker • FastAPI • Azure • Power BI • CI/CD
Enterprise RAG & AI Agent Platform — portfolio project (2026) Prototype RAG platform for technical documents: ingestion and chunking, embeddings, vector retrieval, LangChain orchestration, generation with Hugging Face models, API serving and containerisation. Azure/AWS cloud-ready architecture with a CI/CD pipeline. Python • Hugging Face • LangChain • FAISS/Chroma • RAG • AI Agents • FastAPI • Docker • Azure/AWS • CI/CD

INTERESTS & CULTURAL EXPERIENCES

ASTROPHYSICS	FOOTBALL	NEW YORK	THAILAND
Long-standing interest in space exploration and the science of the Universe.	Regional-level competition: discipline, teamwork and perseverance.	Cultural travel experience in the United States and international exposure.	Asian cultural immersion and training in a traditional Muay Thai camp.
